

Ultra Spacer R

Ultra Spacer® R is a proprietary blend of functionalized polymers and bridging agents. **Ultra Spacer® R** can be tailored to fit Yield Point requirements of the job to be used for. **Ultra Spacer®** can be used with water based or oil based drilling fluids with the inclusion of surfactants for the latter.

Description

Ultra Spacer® R is a newly developed spacer that is used to suit the needs of a given well by controlling the Yield Point of the spacer while maintaining stability of the spacer system. **Ultra Spacer® R** can be used with water based or oil based drilling fluids as a primary spacer system, with surfactants incorporated into the spacer system to meet compatibility need in an oil based system.

Applications

- Primary cementing spacer
- Stable from 5 yp to 25+ yp (lbs/100ft²)
- Non-damaging to the formation
- Coring fluid
- Perforating fluid
- Environmentally friendly (organic)

Packaging

- ▶ **Ultra Spacer® R** is packaged in separately labeled 50 lb bags, 40 bags per pallet
- ▶ Heavy duty shrink wrap
- ▶ Custom packaging available upon request
